DUAL ZONE AUTOMATIC FIRE DETECTION & SUPPRESSION SYSTEM

Model: SR Vision – DZ

Engineered for Safety in Demanding Applications

Designed specifically for:

- Heavy Earth Moving Machinery (HEMM)
- Surface Transport Vehicles (Buses, Vans)
- Oil Rooms & Oil Rigs
- Other Industrial & Hazard-Prone Environments

Compliant with **DGMS Technical Circular No. 06 dated 27.02.2020**, the **SR Vision – DZ** brings advanced fire protection with **Dual Zone Automatic Detection and Suppression**.

Key Features

◆ Dual Zone Fire Protection

Provides precise, zone-targeted suppression to minimize agent wastage:

- **Zone 1:** Engine Compartment
- **Zone 2:** Battery, Fuel Tank, Transmission, Exhaust Pipe & Other High-Temperature Areas

◆ Intelligent Discharge System

Activates **only in the affected zone**, reducing downtime and recharging costs while ensuring efficient fire control.

1. **Status Monitoring**

- Real-time health and malfunction indicators within the operator's cabin.

2. **Manual Activation**

- Dual actuation points:
 - Inside the operator's cabin
 - Outside the vehicle, away from heat zones

3. **Operator-Friendly Integration**

- Compact and streamlined design ensures clear visibility and easy access without obstructing the operator's workspace.

4. **Complete Zone Coverage**

- Safeguards all major fire-prone components including the engine, battery, fuel system, transmission, and exhaust.

5. **Fully Automatic Operation**

- Stays active even during maintenance, built to perform in harsh industrial conditions.

6. **Regulatory Compliance**

- Fully aligned with:
 - **DGMS Circular No. 02 (08.07.2013)**
 - **DGMS Circular No. 06 (27.02.2020)**

7. **High-Efficiency Suppression**

- Fast, focused discharge eliminates chances of re-ignition, ensuring maximum safety and minimal collateral damage.
